Build: Case Debrief

From: Paul Boiler, Government of nuxEland
To: Conis Nikrobo, Extradigital Exceptions and Unknowns Network

Congratulations: your team has been selected to be part of the Extradigital Exceptions and Unknowns Network branch of etiNuxe Intelligence Agency! This is a unit specifically designed to examine extradigital anomalies.

Enclosed are the preliminary findings pertaining to your first assignment.

Wenoti arcade on 92nd avenue has been drawing multiple times its typical amount of current from the district supply. The owner reported these inexplicable surges and claims not to have made any modifications that could have caused them. While the source and nature of the anomaly remain undetermined, the mysteriousness of the situation warrants your further investigation.

The proceedings of [Transcript 1] suggest a possible connection to the arcade machine “The Reckoning V: Origins”. You are advised to run forensics and comparative analysis of the physical and digital evidence after receiving appropriate sanctions.

Location: Wenoti Arcade, 92nd Avenue, nuxEland
Machine ID: MJWHKZLTNBUXE5A
